### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: Prior art of record failed to teach a receiver operable to detect a synchronization position for recovering from a set of received samples having a data detector to detect data from the received signal samples from the synchronization position provided by synchronization detector and each of the samples of filter impulse response and the received samples are represented as a positive or negative constant in dependence upon the relative sign of impulse response samples and received samples respectively, and said filter is to convolve said impulse response with said received signal samples by logically combining the representation of said received signal samples and said impulse response to produce an output signal..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
